

Reducing Costs

The Solution

TEKenable will help you understand how technology can be used to your advantage and will help you achieve your business goals. Samples of our work include:

Reduce Costs

TEKenable was commissioned, by an indigenous financial house, to recommend and deliver a solution designed to allow for extensive automation of the business processes of one of its units. The result of this activity allowed the client to reduce the headcount of the business unit in question from 18 to 7, significantly reducing costs.

Increase Productivity

TEKenable delivered a technology solution for an established Investment Broker, designed to increase productivity within the business, through the use of a document management solution. The client increased the productivity of its key business units by approximately 20%.

Drive Sales

TEKenable aided an online business increase its sales revenues by building a website with an online booking engine, allowing customers to place orders securely and quickly whilst providing the client with full reporting and administrative capabilities. The client now has the most successful online hotel booking site in Ireland.

Return on Investment

TEKenable provided Ireland's oldest high street retail outlet with a business solution that allowed them to move from a paper based gift voucher system to a fully integrated debit card solution, providing the client with an RoI of under 18

The Challenges

Current market trends are pointing downwards, indicating that most organisations, if not now, shortly, will need to reduce their overheads and increase productivity in order to continue to grow.

In past economic downturns many organisations have leveraged technology to provide:

1. Reduced Costs
2. Increased Productivity
3. Upward Drive of Sales
4. Return on Investment

Why Us

Top Level Project/Delivery Skills

TEKenable employs some of Ireland's most experienced senior IT Delivery people, all of whom have a minimum of ten years experience in delivering varied and complex projects across all sectors.
