

TEKCheck

Enhancing Document Redaction Accuracy with AI

TEKCheck is our intelligent redaction verification solution, designed to help organisations confidently manage sensitive information. Powered by AI and built for scale, TEKCheck helps to ensure your documents are redacted accurately, securely, and in compliance with data protection regulations.

Why choose TEKCheck?

TEKCheck combines AI-powered intelligence with a continuous learning loop that **improves accuracy over time** and analyses redacted documents to flag potential oversights using domain-specific intelligence.

TEKCheck is designed to:

- **Identify** unredacted sensitive information.
- **Learn** case-specific context (e.g. valid names, addresses, and identifiers).
- **Retain** knowledge across related documents within a case.
- **Provide** an interactive review experience, allowing users to confirm or dismiss flagged items.

Making it an essential tool for: government departments, regulatory bodies, law enforcement, legal professionals, healthcare providers, insurance companies, call centers, crisis hotlines, paralegals, data protection officers, and redaction service providers.

Offered on a per-organisation or per-page pricing model.

Key Features and Benefits

AI-Assisted Accuracy which automatically detects potential redaction errors and improves over time through user feedback.

Compliance-First Design that is built to support GDPR, FOIA, and other regulatory frameworks with full audit trails and reporting.

Risk Reduction that minimises legal and reputational exposure from data breaches or redaction oversights.

Scalable & Smart that can handle high document volumes with case-specific memory for names, addresses, and more.

Ready to redact smarter? Contact our experts to discover how TEKCheck can transform your document security and compliance workflows.
